

vadiMAP Wins Solar Impulse Efficient Designation

***AI Solution for Advanced C&I Energy Management and Integrated Renewables
is Recognized for Clean Energy Innovation***

MONTREAL, June 28, 2021 – [vadimUS](#), a leading provider of commercial and industrial (C&I) renewable energy solutions announced today that it has received the [Solar Impulse \(SI\) Efficient Solution](#) Label this month for its innovative vadiMAP solution. The Label is granted to a select number of products leading the industry in clean energy technology and business transformation. vadiMAP was recognized for its innovative approach to helping building operators and managers integrate renewables and manage energy resources to reduce their carbon footprint and streamline operations.

vadiMAP is the only AI-based energy management solution for renewable energy integration for the C&I market to be recognized by Solar Impulse. Its unique turnkey approach and easy deployment allow operators to quickly realize both energy and financial savings and benefits.

“Receiving validation from Bertrand Piccard and the Solar Impulse Foundation is a great honor and we believe our missions are aligned in accelerating the energy transition,” said Dan Boucher, Chief Executive Officer of vadimUS.

The vadiMAP solution offers the following benefits:

- Up to 30% savings on energy costs annually
- Easy to implement, turnkey
- Affordable data-driven decisions
- Improved automation and streamlining of operations

About the “Solar Impulse Efficient Solution” Label and The Solar Impulse Foundation

The Solar Impulse Foundation is dedicated to accelerating the implementation of clean and profitable solutions. To address sustainability challenges while enabling economic growth, Bertrand Piccard and the Solar Impulse Foundation have identified 1000+ clean and profitable solutions that give political and economic decision-makers the tools to adopt much more ambitious energy and environmental policies. These products have achieved the highest level of recognition by third party experts and evaluators and receive the “Solar Impulse Efficient Solution” label.
